

# Process of "White Listing" a Web Site on the M86 Security Filter

Step 1: Accessing the web filter.

Step 2: Selecting the correct library for the web site.

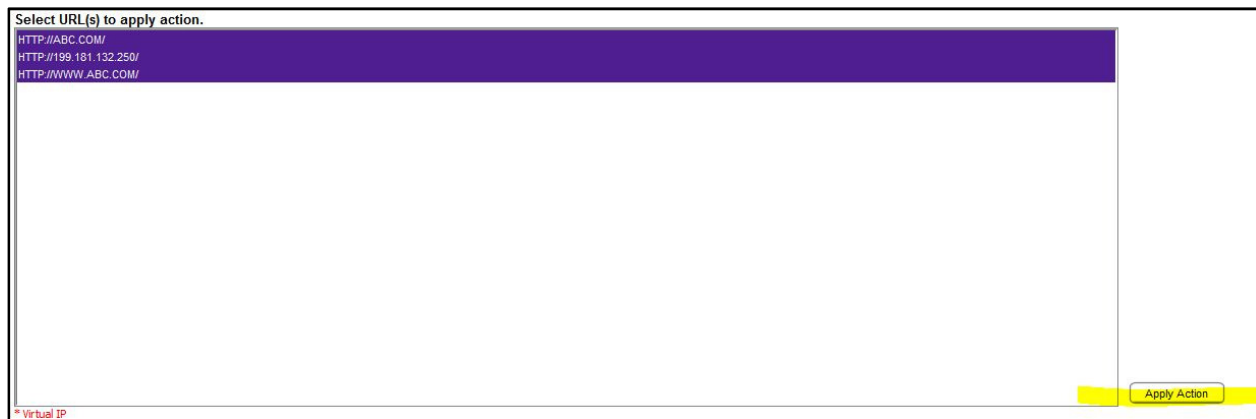

Step 3: Editing the current URL list.

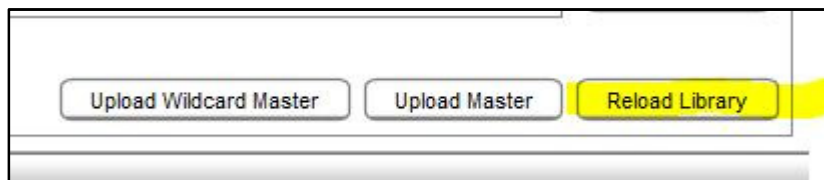

The screenshot shows a web interface titled "Edit URL List". It features a text input field containing "abc.com", followed by "Add" and "Remove" buttons. Below the input field, there is a small text example: "example : www.site.com,site.com,http://www.site.com.".

Step 4: Applying the action/"white listing" the web site.

The screenshot shows a web interface titled "Select URL(s) to apply action.". It contains a list of three URLs: "HTTP://ABC.COM/", "HTTP://199.181.132.250/", and "HTTP://WWW.ABC.COM/". At the bottom right, there is an "Apply Action" button. A small red text "Virtual IP" is visible in the bottom left corner.

Step 5: Reloading the library to reflect changes.

The screenshot shows a web interface with three buttons: "Upload Wildcard Master", "Upload Master", and "Reload Library". The "Reload Library" button is highlighted with a yellow background.
